Sanoj Kumar

Senior Mobile Developer (iOS & Flutter) | AI-Powered Apps

Bengaluru, India | sanojsanoj638@gmail.com | github.com/sanojkumaryadav | linkedin.com/in/sanojcoder | sanojkumar.netlify.app

SUMMARY

4+ years building production iOS & Flutter apps across ride-sharing (PeekUp), health-tech (ekincare), and e-commerce. Expert in Swift, UIKit, SwiftUI, MVVM, real-time sockets, Google Fleet Engine SDK, Firebase, and Google Maps SDK. Sole developer for multiple Flutter apps (Plum, Ensto, Soullab) using GetX, BLoC & Provider. Owns full CI/CD pipelines — Fastlane, GitHub Actions, App Store Connect & Google Play. Actively integrating LangChain + FastAPI to build AI-powered mobile experiences.

WORK EXPERIENCE

App Development Engineer — iOS & Flutter • Es Magico
Aug 2023 – Present | Bengaluru

- Built PeekUp Rider & Driver iOS apps (UIKit) — Uber-like ride booking with Google Maps SDK, Google Fleet Engine Driver & Consumer SDK integration, WebSocket live tracking, and Firebase push notifications across all app states.
- Single-handedly owned features end-to-end: UIKit/SwiftUI screens, API integration, MVVM architecture, and reusable component library — cutting feature dev time ~40%.
- Developed 3 production Flutter apps — Plum (GetX), Ensto (Provider + GetX), Soullab (BLoC) — full FE ownership: UI, API integration, state management, live on Play Store & App Store.
- Owned CI/CD pipelines (Fastlane + GitHub Actions) across Dev/Staging/Prod for all iOS & Flutter projects; managed App Store Connect & TestFlight deployments end-to-end.
- Integrated LangChain + FastAPI to prototype AI-powered in-app recommendation and intelligent ride features.

iOS Developer • ekincare
Aug 2022 – Aug 2023 | Hyderabad

- Shipped Swift/UIKit/SwiftUI features for a health-tech platform; resolved 150+ production bugs — improved crash rates, app store rating, and user retention.
- Collaborated with design, backend & QA teams; followed HIPAA-aligned best practices for secure mobile data handling.

Full Stack Developer Intern • Relinns Technology
Jan 2022 – Mar 2022 | Remote

- Built Node.js/Express/MongoDB services and integrated Google Workspace APIs (Sheets, Drive) into client-facing dashboards.

KEY PROJECTS

PeekUp — Rider & Driver Apps — *UIKit • Google Maps • Fleet Engine • Firebase • Sockets*

- Production ride-hailing iOS apps with Google Fleet Engine Driver & Consumer SDK, live WebSocket tracking, Firebase notifications, multi-env CI/CD & App Store delivery.

Flutter Portfolio — Plum, Ensto, Soullab — *Flutter • GetX • BLoC • Provider • REST APIs*

- Three production cross-platform apps — GetX (Plum), Provider+GetX (Ensto), BLoC (Soullab); full UI, API integration, live on Play Store & App Store.

Online Groceries Shop — *SwiftUI • MVVM • Core Data • REST API*

- End-to-end project — product browsing, cart, checkout, Core Data persistence; clean MVVM architecture showcasing senior-level iOS design patterns.

AI Mobile Feature Prototype — *LangChain • FastAPI • Python • Swift*

- Integrated LangChain agents + FastAPI backend into iOS app to prototype intelligent in-app recommendations and AI-driven chat support.

TECHNICAL SKILLS

iOS: Swift • UIKit • SwiftUI • Core Data • MVVM • MVC • URLSession • Combine • XCTest • XCUITest

Flutter: Dart • GetX • BLoC • Provider • REST APIs • Google Play

Real-time: WebSockets • Google Fleet Engine SDK (Driver & Consumer) • Firebase FCM & Crashlytics • Google Maps SDK

AI / LLM: LangChain • FastAPI • OpenAI APIs • Prompt Engineering

DevOps: Fastlane • GitHub Actions • App Store Connect • TestFlight • CI/CD

Other: Node.js • MongoDB • Git • JIRA • DSA • OOPS • React.js

EDUCATION

B.Tech — Information Technology (CGPA: 8.24)
Gulzar Group of Institutes, Ludhiana | 2018 – 2022

Full Stack Web Development
Masai School, Bengaluru | Nov 2021 – Aug 2022

CERTIFICATIONS & ACHIEVEMENTS

Certs: iOS & Swift Complete Bootcamp • XCUITest for iOS (Swift) • Complete iOS 16 + SwiftUI • ML Workshop with Python

Awards: All India Rank #2 — MHRD Online Quiz • Coordinated CodeHack Event (Coding Ninjas × Arcane Innovation)

CURRENTLY LEARNING

SwiftUI Advanced Patterns • Swift Concurrency (async/await, Actors) • Core ML / Create ML • LangChain Agents & RAG Pipelines • visionOS basics • Kotlin Multiplatform (KMP)
